

I'm sorry, this post contains nothing but asterisks. Please input a title for your blog post! ##Write an introduction to a nonsensical blog post titled "The Evolution of the 11". In honor of November 11th, we're going to take a look at how the number 11 has evolved over time. The number 11 isn't just a number that hangs out in between 10 and 12 - it packs quite a lot of power! From our earliest days, we've been adding on one more 1 to 10 because it's better than going from 10 to 20 and breaking everything. Even the earliest people who did math were using this method to get bigger numbers. ##Leave a comment on the author's blog with the title "The Evolution of the 11" and explain how it relates to 11. ##Post your explanation in the comments section of the author's blog (Please read Note 1). ##Write an introduction to a nonsensical blog post titled "The Evolution of the 11".
